Trim and tilt unit PT-130

PT-130 Features

- Rated for 130hp and smaller motors, fits standard B.I.A. bolt pattern mounts, without drilling holes.
- 150mm set back to enhance boat stability and performance
- 90 degrees of trim and tilt, this allows you to tuck your motor in and get your boat on the plane, smooth and fast.
- $\frac{1}{2}$ inch 6061 T6 alloy aluminum construction with stainless steel fasteners
- Electric over hydraulic actuator rated at least 2250 kg of thrust
- Accommodates screw clamp motors and bolt on motors
- Weighs 20 kg
- Owners/installation manual provided with every unit
- Mounting bolts provided with each unit.
- 5 year structural warranty

PT-130 Features

- These units are CNC milled from extruded aluminum. NO welds or castings to break
- Durability is enhanced because the electric hydraulic system is totally sealed, and made of 100% non ferrous materials, which makes it more impervious to salt water.
- The thrust provided by the permanent magnet motor and the 50mm dia power cylinder make it more than 40% more powerful than other brands.
- Unlike some ball and screw brands, mechanical abrasion which can cause rusting does not occur on the tilt ram. The CMC system uses a no-leak seal and wiper seal to keep dirt and water out of the working parts.
- Spare parts and warranty supplied locally for Australia
- Ideal for retro fit to older motors, where the trim and tilt no longer works
- **Delivery by courier to all parts of Australia, call for pricing**
