Trim and Tilt Unit PT-35

PT-35 Features

- Rated for 35 hp and smaller motors, talk to us about 40hp.
- 140mm set back to enhance boat stability and performance
- 84 degrees of trim and tilt
- 6061 T6 extruded aluminum construction with stainless steel fasteners
- Electric over hydraulic actuator rated at least 2250 kg of thrust
- Accommodates clamp-on or bolt on motors
- Weighs only 10.5 kg
- Owners/installation manual provided with every unit
- 5 year structural warranty
-

PT-35 Advantages

- These units are CNC milled from extruded aluminum. NO welds or castings to break
- Durability is enhanced because the electric hydraulic system is totally sealed.
- The unit is made of 100% non ferrous materials which makes it more impervious to salt water.
- The thrust provided by the permanent magnet motor and the hydraulic power cylinder make it approx 40% more powerful than other brands.
- Unlike some ball and screw brands, mechanical abrasion which can cause rusting does not occur on the tilt ram. The CMC system uses a no-leak seal and wiper seal to keep dirt and water out of the working parts.
- Some other units are painted or powder coated, this falls away after time and exposure to salt water. The PT-35 is extruded alloy aluminium, and will always look great.
- Service and warranty supplied locally for the PT-35
- **Ideal for NEW, Yamaha, Suzuki, Honda, Mercury, Tohatsu, 2str/4str motors with no tilt.**
- **Ideal for NEW, Sail,Maxus,Parsun, and other Chinese outboards with no tilt.**
- Ideal for retro fit to older motors
- A PT-35 will allow you change to a different "economy" motor, but still retain the tilt mechanism
- **Delivery by courier to all parts of Australia, call for pricing**
